DETAILED ACTION

This action is responsive to communication November 15, 2004.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR1.312 to ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Duke Yee on April 12, 2004.

The application has been amended as follows:

Cancel claims 57-78.

Allowable Subject Matter

Claims 1-4, 6-32, and 34-56 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As specifically claimed, the prior art fail to teach or suggest, among other limitations, receiving a master key code from a master key supplier as specifically defined in the specification and using the master key to initiate the method as claimed. The closest prior art (Kucharczyk et al. US Patent 6300873) teaches generating an access code from a unique seed but is silent on teaching the limitations as claimed.
